

LTScore Report: openai-whisper-large-v3--cv-25.0-2026-03-09-br.jsonl (Breton)

Part 1: Visualization

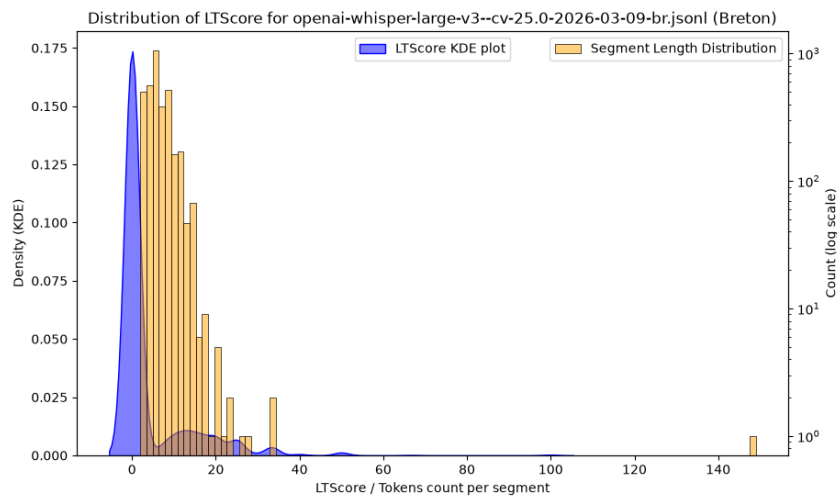

Figure 1: LTScore Distribution

Part 2: Descriptive Statistics

- Segments:
 - Total number: **3492**
 - Average length: **6.37 tokens**
- Scores:
 - Average: **3.97 mistakes found per 100 tokens**
 - Median: **0.00**
 - Standard Deviation of LTScore: **9.34**

Part 3: Mistake Categories Analysis

3.1 Overview

The table below shows the frequency of each mistake category across the segments in the file.

Mistake Category	Count	Percentage
RUMM_KEMMADUR	364	10.42%
RUMM_GER_MELL	283	8.10%
RUMM_A_BEP_SEURT	99	2.84%
RUMM_BARRENNIG_STAGAN	32	0.92%
CASING	14	0.40%
RUMM_VERB	11	0.32%
MISC	6	0.17%
RUMM_RANNIG_VERB	5	0.14%
RUMM_NIVER	1	0.03%

3.2 Details

The following sections provide examples of the most and least grammatical sentences for each mistake category that appears in more than 1% of the segments, along with their respective LTScore and reference sentence if available.

3.2.1 RUMM_KEMMADUR

- Least grammatical sentence containing this category of mistake:
 - LTScore: 100.00
 - Segment: *Pen.*
 - Reference: *pemp*
- Most grammatical sentence containing this category of mistake:
 - LTScore: 5.26
 - Segment: *E vez ya denno diwar-benn an digresko an ink reiz rat bihan apoeus e vez ar reazite merr anez.*
 - Reference: *Evezhiadennou dwb an digreskoù ha n'int ket reizh rak bihan ha pouezus evit ar re a zegemer anezho.*

3.2.2 RUMM_GER_MELL

- Least grammatical sentence containing this category of mistake:
 - LTScore: 66.67
 - Segment: *Un an zu.*
 - Reference: *unan zu.*
- Most grammatical sentence containing this category of mistake:
 - LTScore: 5.00

- Segment: *Eo chezhpañ eo bet strez ken an ko d'an diad-lab o rat a o, evit ar meret a reiz t'roul.*
- Reference: *E Japan eo bet strizh-kenañ kod an dilhad-labour atav, evit ar merc'hed dreist-holl.*

3.2.3 RUMM_A_BEP_SEURT

- Least grammatical sentence containing this category of mistake:
 - LTScore: 40.00
 - Segment: *Blazo eo eo c'hom !*
 - Reference: *Plasoù a chom !*
- Most grammatical sentence containing this category of mistake:
 - LTScore: 5.26
 - Segment: *Ar pepet eo eo eo mont war internet a klask t'eo tout-rout ivez war benn a l'err di bavet.*
 - Reference: *Ar pep aesañ eo mont war internet ha klask titouroù diwar-benn al lec'h dibabet.*

3.3 Quartile-based Analyses

Here we sample random segments from the quartiles of two distributions. First, from the length of the segments (equal-sized chunks), second from the LTScores (value-range cutoffs).

3.3.1 Segments Length Quartiles

This can show errors in the error flagging process. Note that the quartiles are based on equal-sized chunks.

- **Q1 (shortest segments): 873 segments**
 - LTScore: 0.00
 - Segment length: 3 tokens
 - Segment: *Da c'hidokea.*
 - Reference: *Dalc'hit ho ker.*
 - Mistake categories: none
- **Q2 (shorter than the average): 873 segments**
 - LTScore: 0.00
 - Segment length: 5 tokens
 - Segment: *Tormez-vous an abaden !*
 - Reference: *Tomm e vo an abadenn.*
 - Mistake categories: none
- **Q3 (longer than the average): 873 segments**
 - LTScore: 0.00
 - Segment length: 6 tokens
 - Segment: *E gele e rao nour.*
 - Reference: *Digeriñ a ra an nor.*
 - Mistake categories: none

- **Q4 (longest segments): 873 segments**
 - LTScore: 0.00
 - Segment length: 9 tokens
 - Segment: *Peou an deus lec'h e dioc'h ne oa-kemaet.*
 - Reference: *Piv en deus lavaret deoc'h ne oa ket mat ?*
 - Mistake categories: none

3.3.2 LTScore Quartiles

This can show what typical segments look like at each level of grammaticality. Note that the quartiles are based on value-range cutoffs (bands of equal width but different sizes) some quartiles may be empty due to the distribution of scores.

- **Q1 (most grammatical): 2779 segments**
 - LTScore: 0.00
 - Segment: *E plet azevet eo ar maezeg e gomz e soaznek.*
 - Reference: *Pelec'h e vefe ur mezeg a gomzfe saozneg ?*
 - Mistake categories: none
- **Q4 (least grammatical): 713 segments**
 - LTScore: 16.67
 - Segment: *ur reioc'hvank e kraez ur ratrez.*
 - Reference: *Ar re yaouank e-kreiz ar raktres !*
 - Mistake categories: CASING
